

[illegible]

- Cardinalities shown as '1', 'N', or '0..1'.
- Bookings consolidated into Loads are stored in LoadBookingsJSON (denormalized).
- OriginSiteID/DestinationSiteID reference Site table.
- Manifest is typically 1:1 with Load; adjust if multiple manifests per load are required.
- Dispatch may have multiple records per Load to preserve reassignment history; latest is active.
- BillingLine links to Booking and Load; TariffApplied captured as text; optional FK to Tariff can be added.
- NotificationTask uses polymorphic references for RelatedEntityID.
